

PRINTING

PRINTING AUXILIARIES

CODE	PRODUCT NAME	APPLICATION	DESCRIPTION
V127	OJAS - AFV	Accelerant	Fixation accelerant for prints on polyester with disperse dyes. DOSAGE: 5 - 10 gm/kg
V128	OJAS -DPP	Wetting agent	A print paste additive for improving fabric wetting and overcoming foam formation.
V129	OJAS - VDN	Fixation auxiliary	For superheated - steam & hot air fixation of disperse dyes on polyester.
V161	OJAS - HDV	Loop Accelerator	High performance loop accelerator used in polyester print gives excellent levelness to print along with high color value and brilliancy. Dosage of OJAs - HDV: 0.5- 1.0 part per 100 parts print, dry and steam at 1740c for 7min in loop anger.

PRINTING BINDER

V130	OJAS - SVN	Binder	Acrylic based versatile binder with an outstanding resistance to mechanical stress and chemicals
V131	OJAS - 4000	Binder	Suitable for printing with pigment emulsions on all types of cellulose and their blends with polyester
V132	OJAS - 8000V	Binder	Acrylic co-polymer based binder with very good re-emulsification behavior
V133	OJAS - KH	Khadi Binder	Self thickening binder for khadi printing with high fastness properties
V134	OJAS - GGV	Gold Binder	Specially developed for printing gold and silver prints, imparts very soft handle, in addition to high fastness properties

FIXING AGENT

V135	OJAS - CCL	Fixing Agent	External cross-linking agent to improve the fastness of pigment prints
------	------------	--------------	--

THICKNER

V136	OJAS - FRV	Thickner	Synthetic copolymer for printing cotton & viscose rayon with reactive dyes. Excellent levelness.
